## Introduction

Success Inu is a newly launched digital token on the Binance Smart Chain (BSC) network. Our developer's immediate goals are to follow our initial roadmap and grow the holder base to a level where it can become a community managed and promoted token with strong rewards for holders. We will seek to add value to the token with developing utilities such as;

- Branded DApps for use in the DEFI space
- Exchange Listings
- NFT's with rewards

We have developed Version 1.0 of a wallet tracker DApp called Success Tracker - <http://successtracker.online>

This is our first DApp and it covers all BSC network tokens. We will work towards upgrading it with more features and a premium interface. We will adapt it to become multichain and multiwallet.

One of Our long-term goals for Success Inu is the development of a micro transactional platform.

This Platform is intended to improve the way in which ecommerce is undertaken. We are not seeking to limit ourselves to a specific industry as we believe all industries and all people alike will benefit from being able to undertake fast low-cost decentralized transactions.

The major long-term benefit for Success Inu, will be for our holders to be able to undertake ecommerce transactions with a range of providers across a range of industries. It is essentially a decentralized platform for helping people, connect and transact.

Users can buy and exchange the token between each other. The platform will be multilingual so that people in any country will be able to transact and to also invest in the Success Inu token. Investing in the token itself will provide ongoing rewards to holders by way of passive income and deflation.

We are also looking at a business case to potentially develop a future DEFI Exchange where Success Inu can be paired with a stablecoin and can be purchased directly on the exchange.

## Blockchain Technology

Blockchain technology is one of the few modern technologies which are providing people with better privacy and protection. It has many advantages over conventional technologies. It has diverse applications in multiple fields. But most importantly the use of blockchain technology for development and use of cryptocurrencies such as Success Inu.

This technology has some unique characteristics like decentralization and transparency. It provides high-level security and safety to the users. Therefore, almost all cryptocurrencies are based on blockchain technology. Unlike physical currencies, digital tokens are more secure and easier to transfer without the complex systems of the banking sectors. More so, they provide many other services like exchanges and staking benefits for the users. They have improved peoples experience over the traditional centrally controlled services where the large institutions have held a monopoly for many years.

# Our Roadmap

## STAGE 2

- Whitepaper Development
- Apply for Coinmarketcap Listing
- Reach 2,500 Token Holders
- Reach 1,000 Telegram Holders
- Audify Contract Audit
- Airdrops

02

## STAGE 3

- Social Media Marketing Campaign
- Reach 15,000 Token Holders
- Reach 3,000 Telegram Members
- Token Wallet Tracker Version 1
- Exchange Listing Application
- Commence work on Micro Transaction Platform

03

## STAGE 1

- Launch Token on BSC Network
- Deploy Social Media Networks
- Reach 500 Token Holders
- Reach 250 Telegram Holders
- Safe Solidity Contract Audit
- Apply for CoinGecko Listing

01

## STAGE 4

- Engage PR Company
- Major Marketing Campaign
- Exchange Listings
- Reach 30,000 Token Holders
- Reach 6,000 Telegram members
- Further development and testing of Micro Transaction Platform

04

## Tokenomics

Success Inu Token was Launched on the Binance Smart Chain Network (BSC). The reason why we selected the BSC network was due to the low transaction fees. 1 quadrillion was the initial token supply at Launch.

- 75% of the Initial Token Supply was Burnt at Launch
- 1% of every transaction sent to Burn Wallet (Deflationary)
- 1% of every transaction redistributed to holders (Passive Income)
- 1% of every transaction redistributed to the Liquidity Pool (Stability)
- 1% of every transaction redistributed to marketing Wallet (Growth)

The Liquidity has been locked with [Teamlock.finance](https://www.teamlock.finance/)
